

Complete bonding solutions for modern wood manufacturing.

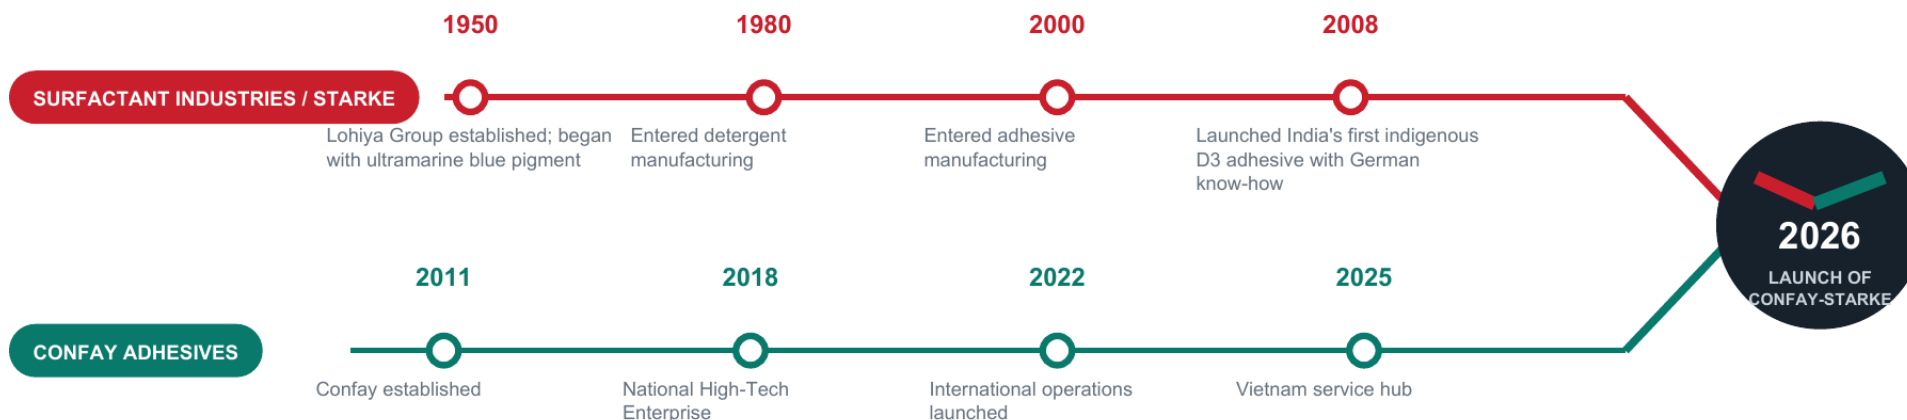

PUR HOT-MELT ADHESIVES

Indian market understanding.
Global adhesive technology.
One solution-led partnership.

THE COMBINED PROPOSITION

One partnership. Two adhesive platforms.

Starke brings proven water-based wood adhesives, while Confay brings high-performance reactive PUR hot-melt technology. This unique combination creates a broader, application-led portfolio for furniture, panels, doors, and interior components.

WHY US?

From wood joinery to industrial lamination, profile wrapping, and edge banding, we provide a one-stop solution for furniture manufacturers.

WHO WE ARE

Built on complementary strengths.....Specialist in wood bonding

STARKE / SURFACTANT INDUSTRIES

India-based expertise in water-based wood adhesives and emulsion polymers, supported by German know-how and products positioned to European D3 standards.

CONFAY ADHESIVES TECHNOLOGIES

A focused PUR hot-melt specialist with R&D, application testing, industrial-scale manufacturing and a global service footprint.

TECHNOLOGY PLATFORMS

A complete wood-bonding architecture.

WATER-BASED PLATFORM

Reliable bonding for wood and panel applications

- PVAc-based D3 water-resistant wood adhesives
- General-purpose and value-focused white glues
- PVC, acrylic and foil-to-board bonding solutions
- Sprayable membrane and specialty application grades

REACTIVE PUR PLATFORM

Industrial efficiency for demanding multi-material bonds

- Flat lamination across panels, films, foils and metals
- High-strength, water-resistant edge banding
- Profile and large-panel wrapping systems

Right Application, Right Adhesive

RESEARCH AND APPLICATION ENGINEERING

R&D that connects chemistry to the production line.

01

FORMULATION

Special polymer development and adhesive formulation design.

02

TESTING

Physical, chemical and application-level analysis for finished-product compatibility.

03

SIMULATION

Confay's application center references simulated lines for edge banding, flat lamination and profile wrapping.

04

CUSTOMIZATION

Customer requirements can be translated into process trials, grade selection and validation.

QUALITY, STANDARDS AND TECHNICAL DEPTH

Confidence is built through evidence.

01

ISO SYSTEMS

Starke(Surfactant Industries) conforms to ISO 9001:2015 and ISO 14001:2015. Confay also presents ISO quality and environmental management certifications.

02

EUROPEAN/JAPANESE WOOD STANDARD

Starke(Surfactant Industries) conforms to European and Japanese standards.

03

TEST REPORTS

Confay-Starke products comply with RoHS, REACH, EN, FDA, ASTM, CPSIA and customer-specific testing documentation.

04

IP AND RECOGNITION

Confay presents patents, high-tech enterprise credentials and industry association recognition.

Complete portfolio across the woodworking value chain.

01

JOINERY & ASSEMBLY

D3 water-resistant and premium PVAc wood adhesives

02

FLAT LAMINATION

PUR systems for panels, films, foils and multi-material surfaces

03

EDGE BANDING

PUR solutions for strong, clean and moisture-resistant edges

04

PROFILE WRAPPING

PUR systems for furniture profiles, frames and wall panels

STARKE PLATFORM

Water-based adhesives for dependable everyday bonding.

STARKE D3

Water-resistant PVAc wood adhesive positioned to EN 204/205 D3 standards for wood, laminate, plywood, veneer, blockboard, hardboard and MDF.

STARKE ON

Rapid development of water resistance for demanding, time-sensitive woodworking.

ARTCOL

Premium water-based white wood adhesive made with German know-how for strong furniture bonds.

PV-7050

Specialty adhesive for PVC sheets, acrylic sheets and paper foils on plywood, MDF, fibreboard and particleboard.

STARKE WZ1

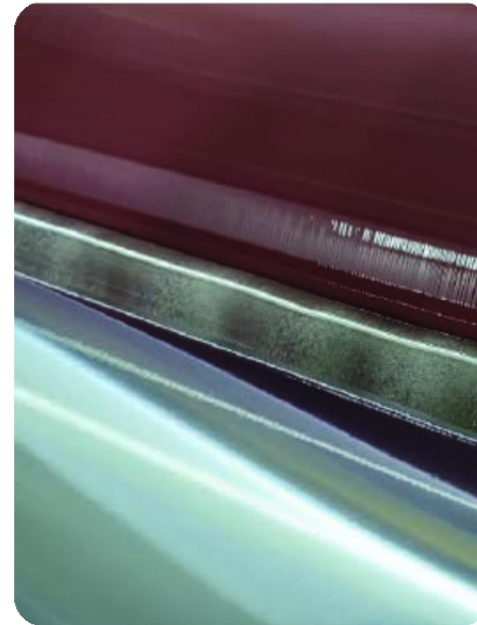

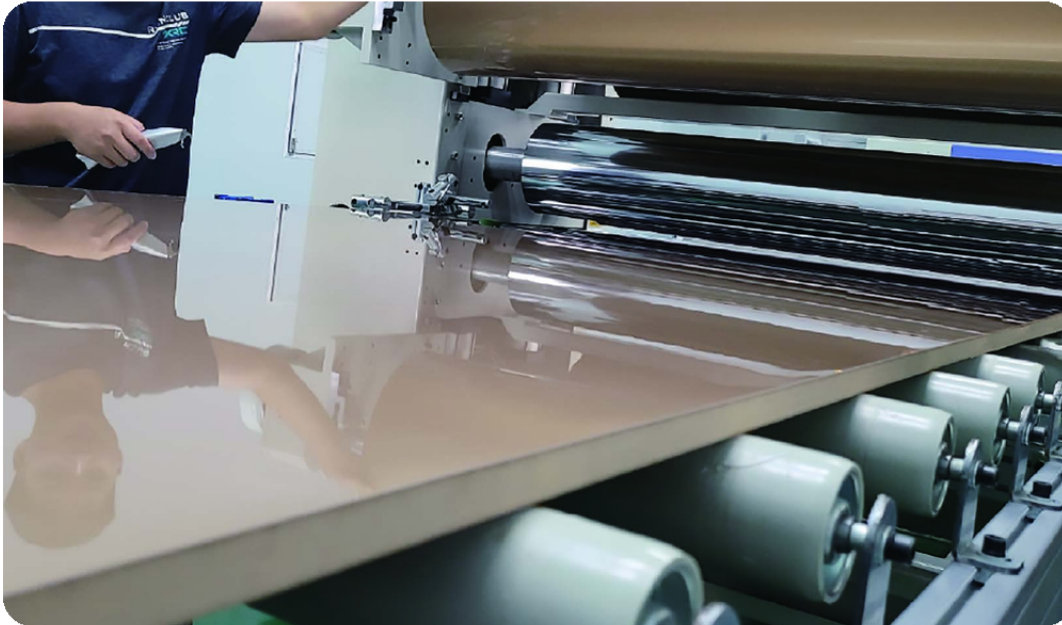

Sprayable water-based adhesive for PVC membrane application on wooden doors.

ARTFIX / RICHCOL

General-purpose and value-focused grades for wood, handicraft, paper and allied applications.

CONFAY PLATFORM

PUR flat lamination for modern panel production.

PUR PACKAGING

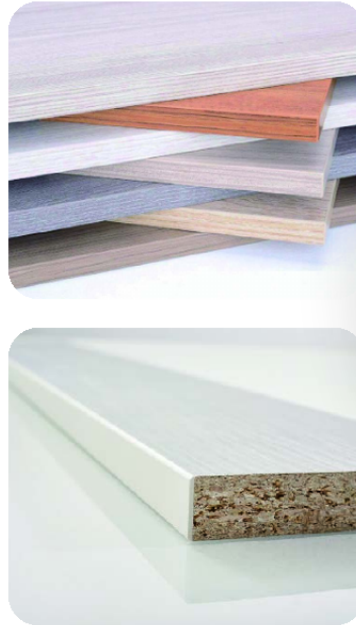

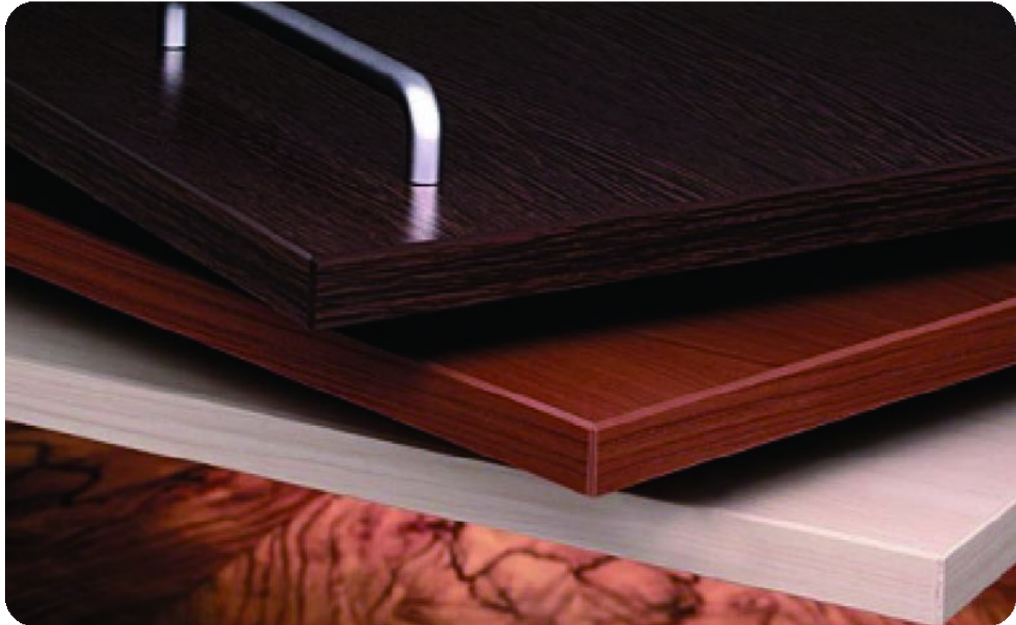

50 KG | FLAT LAMINATION

- Bonds surface materials such as PVC, PET, decorative paper, veneer and metal to wood-based and composite panels.
- Supports high-gloss, transparent, veneer-focused and multipurpose application needs.

CONFAY PLATFORM

PUR edge banding for strong, clean edges.

20 KG EDGE-BANDING GRADES

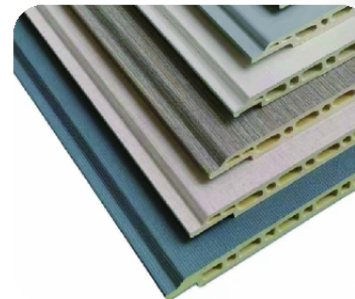

CF-8290

CF-8295

- Designed for wood and wood-based panels with PVC, ABS, PP, PMMA, veneer and selected metal edge materials.
- High bond strength, temperature resistance, waterproof performance and reduced visible glue lines.

CONFAY PLATFORM

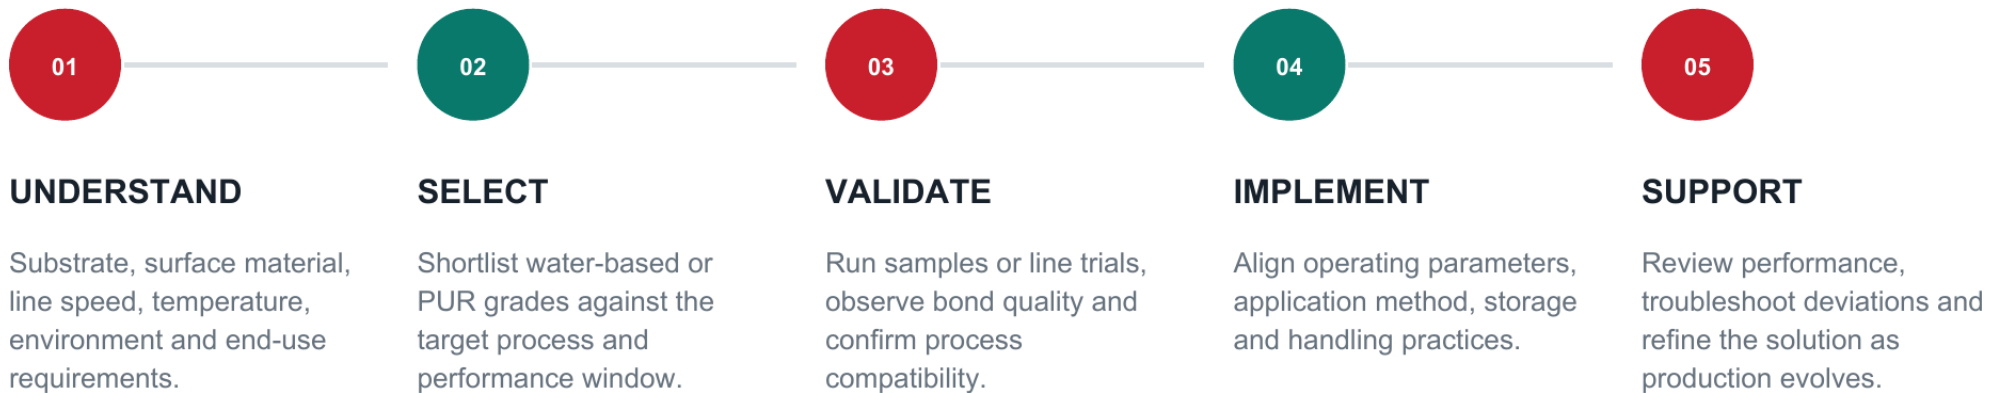

PUR profile wrapping across furniture and interiors.

- For furniture profiles, skirting, drawer frames, wall panels, ceilings, door frames and large-panel wrapping.
- Compatible families cover wood, MDF, plastic, wood-plastic and metal profiles with decorative films, papers, CPL, PET and veneers.

CUSTOMER ASSURANCE MODEL

From product supply to process confidence.

THE OPERATING PRINCIPLE

The right adhesive is not chosen by product name alone.

It is chosen by matching chemistry, substrate, equipment, process window and the customer's definition of success.

SUPPLY AND MARKET FOOTPRINT

Local understanding. International manufacturing reach.

INDIA

Starke market presence and wood-adhesive manufacturing base

CHINA

Confay R&D, application engineering and PUR manufacturing

GLOBAL

20+ countries and region

CUSTOMER VALUE

A stronger reason to choose - CONFAY STARKE.

01

PORTFOLIO BREADTH

Water-based and PUR platforms cover more of the customer's woodworking and panel-bonding requirements.

02

APPLICATION DEPTH

Solutions are organized around joinery, lamination, edge banding and wrapping - not just chemistry.

03

TECHNICAL PEDIGREE

Starke's German advisory heritage combines with Confay's dedicated PUR R&D and application facilities.

04

SCALABLE SUPPLY

India-facing market capability is complemented by Confay's stated 20,000+ ton PUR output and sales scale.

05

RESPONSIBLE CLAIMS

Standards and certifications are matched to the relevant company, product and supporting documentation.

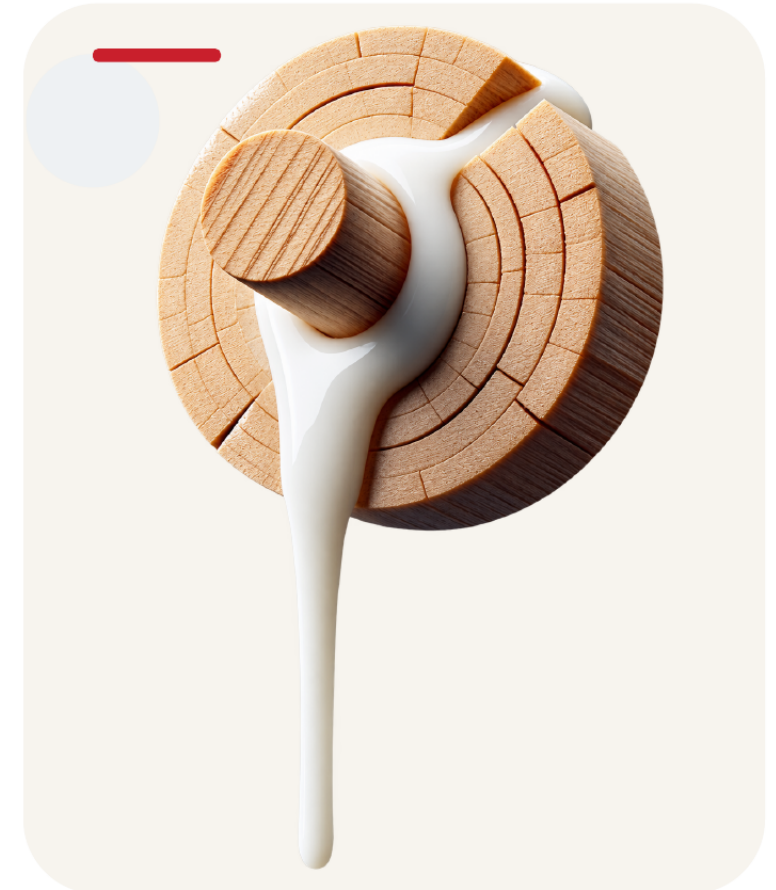

06

LONG-TERM SUPPORT

A validation-led approach helps reduce process uncertainty and supports continuous improvement.

LET'S BUILD THE RIGHT BOND

**Bring us the substrate.
Bring us the process.
Bring us the challenge.**
